14

These days many people eat ready – made food .This means food which is already prepared, in packets or cans, or often frozen. People also go to fast foods restaurant a lot, where they buy take- away meals. This type of food is suitable in the busy, modern world, but it often contains a lot of fat or sugar. If you eat a lot of sugar, dentists say you might get holes in your teeth Similarly, if you eat a lot of fat, doctors will tell you that this is bad for your heart. Most scientists say that the best food is fresh, natural food such as fruit and vegetables .They also say that we should **cut down** on the amount of fat we eat. Nowadays we eat too much oil and butter. Instead of frying food in fat, we should lightly boil it, or eat it uncooked as in salads. Food which hasn't been cooked often contains more vitamins. These vitamins are often destroyed during cooking. Of course, it is as we get older that we start to notice the effects of bad eating habits. When we're young we don't have to worry too much, but it's a good idea to develop good eating habits as early in life as possible.

- Answer the questions. (3 points)

1. What is ready-made food?

.....

2. What do scientists suggest people to eat?

.....

3. Why is uncooked food often better for us?

.....

- Choose the best answer. (2 points)
